

# Brain Awareness Week

at THE UNIVERSITY of  
MISSISSIPPI

## What's Love Got to Do with It: The Myths and Mysteries of the Monogamous Prairie Vole

We are social animals. Social interactions involve partner fidelity and mating decisions. But how do we choose our loving companions? Dr. Alexander Ophir, a social neuroscientist, will show us *what's the brain got to do with it*.

### Presented by:

Alexander Ophir, Ph.D.

Director of the Integrative Neuroethology Laboratory  
Cornell University, Ithaca, NY

### When and where:

Thursday, April 5<sup>th</sup>, 4:00 pm

Lamar Hall (Room 129)

University of Mississippi – Oxford campus
